

New Student Orientation - Fall 2025
Graduate Major in Science and Technology for Health Care and Medicine
Document released on Sep. 29, 2025

The orientation material

1. Study Guide of STM 2025 Fall

日本語の学修案内は、大学Webサイトで確認してください。

The Japanese version can be found on the Science Tokyo website.

https://www.titech.ac.jp/guide/guide_2025/graduate/

2. STM Research Planning

3. Course Schedule (3Q, 4Q, 3-4Q) - STM

1Q～2Q授業に関する案内は、2025年4月のオリエンテーション資料を参考にしてください。

For information on classes from 1Q to 2Q, please check the "April 2025 Student Orientation Materials"

4. STM Internship - International Presentation

5-1. Lecture Information_STM.C406 (Japanese lectures)

「人間医療科学技術特別講義第一」

ー生命がもつ遺伝子とゲノムの理解と制御、そして疾病の発症ー

5-2. Lecture Information_STM.C407 (Japanese lectures)

「人間医療科学技術特別講義第二」

ー生体反応の情報をを用いた認知行動評価ー

6. STM Research Ethics Education

The requirements listed in this document include the contents of the ethics to be possessed as a Science Tokyo student.

Please make sure to study these items and acquire the necessary understanding of ethics as soon as possible after enrollment.

7. Entrepreneurship Courses Orientation Info

8-1. Takuetsu Programs and Others Info

8-2. 卓越教育院コース等ガイダンス資料

9-1. Introduction to Science Tokyo Library

9-2. 図書館の利用と学術情報の入手

10. Taking 600-level courses in the Master's degree program/ STM修博一貫プログラム案内

11-1. Financial support for doctoral students

11-2. 大学院課程学生への経済的支援

12-1. Security Export Control

12-2. 安全保障輸出管理

Graduate Major in Science and Technology for Health Care and Medicine

Recent years have seen striking advances in engineering and technology related to human health, medicine, and environments across the various fields of science and engineering. However, it is almost always the case today that people are educated separately in each specialty; there are few instances of multidisciplinary educational systems. At the same time, issues related to human medicine, health, and environments are becoming more complex and diverse. Addressing these issues demands comprehensive and innovative knowledge and skills beyond conventional frameworks. Integrated learning of advanced and multidisciplinary expertise in the field of science and technology, based on deep understanding of humans and society, is essential.

In this course, areas of specialization including science and engineering, medical and dental science, nursing, medical technology, and health science are functionally integrated in education and research on science and technology for health care and medicine. The aim is to educate individuals to have a deep understanding of people and society, high-level expertise in science and technology, a broad outlook, an ability to think deeply, comprehensive decision-making abilities, a sense of ethics, and a global perspective and international mindset. We also aim to train individuals who have the creativity and leadership to pioneer new fields beyond existing areas of specialization, and can act globally. By promoting exchanges between different fields of specialization, we can also expect to bring new perspectives to each field as well as to create new academic disciplines that look to the future.

【Master's Degree Program】

1. Outline

In addition to expertise in the various fields of science and engineering, the course aims to cultivate multidisciplinary expertise in human science, medical and health science, bioethics, related to environments where people are involved, and the ability to understand other fields, as well as issue-solving skills, problem-solving abilities in society, and communication and leadership abilities. Specifically, through lectures on specialized subjects and cutting-edge technologies related to science and technology for health care and medicine, the course develops researchers and engineers in Science and Technology for Health Care and Medicine who have the necessary knowledge and skills.

In the Master's program, students acquire expertise in Medical and Dental Science and Health Sciences in addition to specialty subjects in science and engineering—Mechanical Engineering, Systems and Control Engineering, Electrical and Electronic Engineering, Information and Communications Engineering, Materials Science and Engineering, Chemical Science and Engineering, Computer Science, Life Science and Technology. The program cultivates people with high intelligence and refinement, a broad outlook, the ability to think deeply, comprehensive decision-making abilities, a strong sense of ethics and technology, and an international mindset. These people will have the ability to identify issues and advanced abilities to solve them, both in the development of cutting-edge technology and in academic research.

Specifically, students will:

1. Systematically learn professional knowledge and skills necessary for advanced research and development in the Science and Technology for Health Care and Medicine field based on professional knowledge of a disciplinary field, which students learned in the undergraduate course.
2. Learn professional knowledge and skills by developing the advanced knowledge and skills that students acquired in their undergraduate.
3. Deepen one's professional ability and creativity through lab seminar, research planning for master's thesis subjects, and master's thesis research.

2. Competencies Developed

In this course, in order to achieve the above objectives, the goal of study is to acquire the following knowledge and abilities:

- Knowledge essential for science and technology for health care and medicine such as human science, medical & health science, bioethics, and the environment in which humans are involved.
- Advanced knowledge and skills of science and technology for health care and medicine in each specialized field.
- Basic learning ability to understand expertise in different fields.
- Ability to challenge the development of new areas through integration of issues and problem solving methods in each area.
- Ability to set issues in relation to society and solve problems by making use of their own technology and creativity.
- Leadership and communication skills that can communicate their thoughts and skills correctly and collaborate to address issues.

3. Learning Goals

To acquire the skills listed in “Competencies Developed”, students in this program will have the following training.

- A) Acquiring fundamental expertise in the field of “Science and Technology for Health Care and Medicine”.

Acquiring fundamental expertise in the research field of “Science and Technology for Health Care and Medicine” through required courses and restricted elective courses in Major Courses.

- B) Acquiring advanced expertise in the field of “Science and Technology for Health Care and Medicine”.

Acquiring advanced professional knowledge and skills through various science and engineering courses in Major Courses of “Science and Technology for Health Care and Medicine”.

- C) Acquiring research-executing skills, problem-solving.

Acquiring research-executing skills and problem-solving skills through Research Seminars, Research-Related Courses as well as performing research in the lab by using obtained expertise.

- D) Acquiring experience in relation to engineering ethics and society.

According to lectures by teachers working in industries, learning ethical and social values relevant to society and research and understanding engineering ethics.

- E) Acquiring communication skills.

Learning advanced communication skills required as international professionals through discussion with researchers in the country and overseas.

- F) Cultivating sophistication in relation to liberal arts and humanities.

Learning liberal arts and humanities required as researchers through Humanities and Social Science Courses, Entrepreneurship Courses.

4. IGP Completion Requirements

The following requirements must be met to complete the Master's Degree Program of this major.

1. Attain a total of 30 credits or more from 400- and 500-level courses.
2. From the courses specified in the Graduate Major in Science and Technology for Health Care and Medicine standard curriculum, you must meet the following requirements (see Table M1 below).
 - You have acquired at least 19 credits from Major courses;
 - You have acquired 8 credits from Research Seminars;
 - You have acquired 2 credits from Research-related Courses;
 - Must acquire 2 credits from required Major Courses and 3 credits from restricted elective Major Courses;
 - Must acquire a minimum of 5 credits from Liberal Arts and Basic Science Courses (3 credits from Humanities and Social Science Courses of which 2 credits must be from 400-level courses and 1 credit from 500-level courses, and 2 credits from Entrepreneurship Courses).
3. Pass the master's thesis review and defense.

Table M1 shows course categories and the number of credits required to complete the Master's Degree Program of this major. It also shows the required minimum credits in each course category and points to be noted when selecting the required courses and electives.

The learning goals to be obtained by students through courses are listed as “associated learning goals”. Prior to registering courses, students need to fully understand the course goals.

Table M1. Graduate Major in Science and Technology for Health Care and Medicine Completion Requirements

Course category		<Required courses> Required credits	<Electives> Minimum credits required	Minimum credits required	Associated learning goals	Comments
Liberal arts and basic science courses	Humanities and social science courses		•2 credits from 400-level •1 credit from 500-level	5 credits	D, F	
	Entrepreneurship Courses		2 credits		D, F	All Graduate Attributes (GA) should be acquired. (Refer to Section 7 for the definition of GA.)
	Other courses					

Core courses	Research seminars	STM Seminar S1 STM Seminar F1 STM Seminar S2 STM Seminar F2 A total of 8 credits, 2 credits each from the above courses.		19 credits	C, E	
	Research-related courses	Research Planning for Master Thesis I of STM Research Planning for Master Thesis II of STM A total of 2 credits			C, E	
	Major courses	Interdisciplinary Research Training of STM A total of 2 credits	3 credits from restricted electives		A, B, D, E	
	Major courses and Research-related courses <u>outside the Science and Technology for Health Care and Medicine</u> standard curriculum					
Total required credits		A minimum of 30 credits including those attained according to the above conditions				
Note		<ul style="list-style-type: none"> • Japanese Language and Culture Courses offered to international students can be recognized as equivalent to the Humanities and Social Science Courses of the corresponding course level. • For details of the Liberal Arts and Basic Science Courses, please refer to the relevant sections. 				

5. IGP Courses

Table M2 shows the Core Courses of the Master's Degree Program in this major. Graduate Majors listed in the Comments column offer core courses that are recognized as equivalent to the corresponding Major Courses or Research-related Courses in the standard curriculum of this major.

Table M2. Core Courses of the Graduate Major in Science and Technology for Health Care and Medicine

Course category		Course number	Course title			Credits	Competencies	Learning goals	Comments
Research seminars	400 level	STM.Z491.R	◎	★	STM Seminar S1	0-2-0	1,3,5	C,E

6. IGP Courses That Can Be Counted as Humanities and Social Science Courses

None

7. IGP Entrepreneurship Courses and IGP Courses That Can Be Counted as Entrepreneurship Courses

In order to fulfill the completion requirements for the master's degree program, students must attain at least two credits in Entrepreneurship Courses, and should satisfy all of the Graduate Attributes (GAs) specified in Table M-1 of the "Entrepreneurship Courses" listed as "Liberal Arts and Basic Science Courses" in the Guide to Graduate Education and International Graduate Program, as well as shown below. Students will be evaluated in regards to GA achievements at the time of their degree completion. For courses with two GAs, both GAs stipulated for the courses are considered to be acquired if students attain the corresponding credits for those courses.

Entrepreneurship Courses and Major Courses that enable students to acquire GAs and are recognized as equivalent to Entrepreneurship Courses, offered by the Graduate Major, are listed in Table M3 below. Students can also acquire GAs and credits by taking the Entrepreneurship Courses offered by the Center for Entrepreneurship Education (CEE) listed as "Liberal Arts and Basic Science Courses" in the Guide to Graduate Education and International Graduate Program.

It must be noted that credits attained from courses that are recognized as equivalent to Entrepreneurship Courses can be counted towards the completion requirements of the master's degree program, either for Major Courses or for Entrepreneurship

Courses (not for both). Nevertheless, even in cases where credits pertaining to courses that are not considered as Entrepreneurship Courses are attained, the associated GAs may be considered by the Graduate Major to have been acquired.

For Graduate Attributes, refer to the Guide to Entrepreneurship Courses.

The Graduate Attributes of the Master's Degree Program are listed in Table M-1 as follows:

GA0M: You can clearly plan your own career and recognize the abilities necessary for realizing it while considering ethics and relevance to societal problems.

GA1M: You can acquire the knowledge, skills, ethics and entrepreneurship necessary for realizing your planned career and contribute to societal problem-solving while collaborating with other experts

Table M3. Courses of the Graduate Major in Science and Technology for Health Care and Medicine recognized as equivalent to Entrepreneurship Courses, and Entrepreneurship Courses

8. Research Related to the Completion of Master's Theses

In the Master's thesis research, students experience the research process and aim to improve problem-setting abilities, problem-solving abilities and communication skills. An example of the flow of the Master's thesis research for this is shown below. The evaluation of the academic outcome is carried out as appropriate. Students also consider the course plan as related to direction of their thesis research.

- Presentation of Research Plan and Interim Presentation

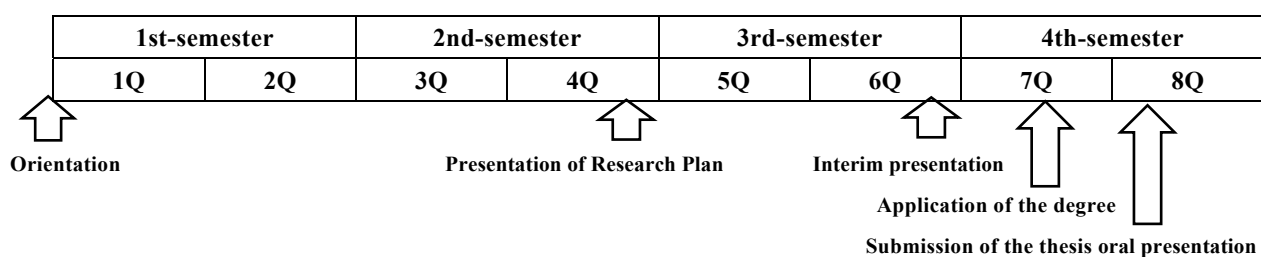

It is important to conduct research systematically and check the progress to produce research results. Students conduct "Presentation of Research Plan" (Research Planning for Master Thesis I) in 4Q and "Interim presentation" (Research Planning for Master Thesis II) in 6Q to understand their research background and purpose clearly.

- Master's Thesis Review Criteria

The Master's thesis and its overview must be a self-authored thesis written in English. The thesis must include the student's original consideration, and also include new findings in the Science and Technology for Health Care and Medicine field or useful research that contributes to the development of the Science and Technology for Health Care and Medicine field.

- Master's Thesis Review Procedure

After preliminary review by the examiner, oral presentations will be made for final review and evaluation. The oral presentations must be given in English.

9. Seamless Transition between Degree Programs

In the Science and Technology for Health Care and Medicine course, we cultivate people who have the basic academic skills to deeply understand people and society and high-level, multidisciplinary expertise in science and technology, a broad outlook and ability to think deeply, comprehensive decision-making abilities, a strong sense of ethics and technology, and a global perspective and international mindset. These people will be able to advance original and challenging cutting-edge research and development, and will have the creativity and leadership to pioneer new fields beyond existing areas of specialization and the ability to act globally. The learning objectives for this are to acquire the following abilities:

- Basic expertise to be able to integrate a wide range of specialty fields and understand specialties in other academic disciplines as needed for a multidisciplinary understanding of science and technology for health care and medicine.
- The ability to address complex problems, uncover and identify issues, and develop research plans.
- The communication and leadership abilities needed to advance international research.

In the curriculum for the doctoral course, in the 600 series, Research Planning for Doctoral Thesis I of STM, Research Planning for Doctoral Thesis II of STM, STM Seminar S1~F5, Teaching methods for Science and Technology for Health Care and Medicine, STM International Internship, International Presentation III & IV of STM, Research Working in Company of STM, STM off-campus advanced training I & II have been established, not only for improvement of expertise through cutting-edge research based on the curriculum from the 400 series. It is an organic curriculum that can effectively improve communication skills and leadership skills.

【Doctoral Degree Program】

1. Outline

With the expertise in science, engineering and dental/medical fields, and the multidisciplinary expertise that is essential to research and development in science and technology for health care and medicine that was obtained prior to the Master's program as a foundation, students will acquire the ability to examine the essence and universality of individual issues, leading to solutions. At the same time, the program develops outstanding individuals who have the ability to take on the challenge of pioneering new fields, display international leadership, and contribute to human well-being and the development of science and technology.

Specifically, students will:

1. Acquire advanced professional knowledge in their own research field through lab seminars and research planning for doctoral thesis subjects, and cultivate a wide range of outstanding expertise and ethics in the field of Science and Technology for Health Care and Medicine.
2. Foster leadership skills, internationality and communication skills in teaching methods and international presentation subjects, and obtain career experience by conducting international internships and research in company subjects.
3. Foster outstanding creativity, task-setting abilities and problem-solving skills that can lead the international community through conducting the world's highest level of research in doctoral thesis research.

2. Competencies Developed

The learning objective of this Doctoral course is to acquire the following abilities and knowledge to a higher standard than the Master's course in order to achieve the goals listed above:

- Knowledge about natural sciences, bioethics, the foundation of health, medical and environmental sciences necessary for research and development in the science and technology for health care and medicine field.
- Advanced professional knowledge and skills related with science and technology for health care and medicine in each disciplinary field.
- Fundamental expertise that can understand different disciplinary knowledge.
- Ability to challenge and explore new research & development areas.
- The ability to identify issues in society and solve these issues by using one's skills and creativity.
- Communication and leadership skills that enable one to accurately convey their ideas and skills to others and collaborate on tasks.

3. Learning Goals

To acquire the skills listed in “Competencies Developed”, students in this program will have the following training:

- A) Acquiring fundamental expertise in the field of “Science and Technology for Health Care and Medicine”.

Acquiring fundamental expertise in the research field of “Science and Technology for Health Care and Medicine” through required courses and restricted elective courses in Major Courses.

- B) Acquiring advanced expertise in the field of “Science and Technology for Health Care and Medicine”.

Acquiring advanced professional knowledge and skills through science, engineering and dental/medical courses in Major Courses of “Science and Technology for Health Care and Medicine”.

C) Acquiring research-executing skills, problem-solving.

Acquiring research-executing skills and problem-solving skills through Research Seminars, Research-Related Courses, as well as research working in lab by using obtained expertise.

D) Acquiring experience in relation to engineering ethics and society.

According to lectures by teachers working in industries, learning ethical and social values relevant to society and research and understanding engineering ethics.

E) Acquiring communication skills.

Learning advanced communication skills required as international professionals through discussion with researchers in the country and overseas.

F) Cultivating sophistication in relation to liberal arts and humanities.

Learning liberal arts and humanities required as researchers through Humanities and Social Science Courses, Entrepreneurship Courses.

4. IGP Completion Requirements

The following requirements must be met to complete the Doctoral Degree Program of this major.

1. Attain a total of 24 credits or more from 600-level courses.
2. From the courses specified in the Graduate Major in Science and Technology for Health Care and Medicine standard curriculum, you must meet the following requirements (see Table D1 below):
 - You have acquired 12 credits from Research Seminars;
 - You have acquired 4 credits from Research-related Courses;
 - Must acquire a minimum of 2 credits from restricted elective Major Courses;
 - Must acquire a minimum of 6 credits from Liberal Arts and Basic Science Courses (2 credits from Humanities and Social Science Courses, and 4 credits from Entrepreneurship Courses).
3. Pass the doctoral dissertation review and defense.

Table D1 shows course categories and the number of credits required to complete the Doctoral Degree Program of this major. It also shows the required minimum credits in each course category and points to be noted when selecting the required courses and electives.

The learning goals to be obtained by students through courses are listed as “associated learning goals”. Prior to registering courses, students need to fully understand the course goals.

Table D1. Graduate Major in Science and Technology for Health Care and Medicine Completion Requirements

Course category		<Required courses> Required credits	<Electives> Minimum credits required	Minimum credits required	Associated learning goals	Comments
Liberal arts and basic science courses	Humanities and social science courses		2 credits	6 credits	D, F	
	Entrepreneurship Courses		4 credits		D, F	All Graduate Attributes (GA) should be acquired. (Refer to Section 7 for the definition of GA.)
	Other courses					
Core courses	Research seminars	STM Seminar S3 STM Seminar F3 STM Seminar S4 STM Seminar F4 STM Seminar S5 STM Seminar F5 A total of 12 credits, 2 credits each from the above courses.		18 credits	C, E	
	Research-related courses	Research Planning for Doctoral Thesis I of STM Research Planning for Doctoral Thesis II of STM A total of 4 credits			C, E	
	Major courses		2 credits		A, B, D, E	
	Major Courses and Research-related courses <u>outside</u> the Graduate Major in Science and Technology for Health Care and Medicine standard curriculum					

Total required credits	A minimum of 24 credits including those attained according to the above conditions
Note	<ul style="list-style-type: none"> • Japanese Language and Culture Courses offered to international students can be recognized as equivalent to the Humanities and Social Science Courses of the corresponding course level. • For details of the Liberal Arts and Basic Science Courses, please refer to the relevant sections.

5. IGP Courses

Table D2 shows the Core Courses of the Doctoral Degree Program of this major. Graduate Majors listed in the Comments column offer core courses that are recognized as equivalent to the corresponding Major Courses or Research-related Courses in the standard curriculum of this major.

Table D2. Core Courses of the Graduate Major in Science and Technology for Health Care and Medicine

Course category		Course number	Course title			Credits	Competencies	Learning goals	Comments

6. IGP Courses That Can Be Counted as Humanities and Social Science Courses

None

7. IGP Entrepreneurship Courses and IGP Courses That Can Be Counted as Entrepreneurship Courses

In order to fulfill the completion requirements for the doctoral degree program, students must attain at least four credits in Entrepreneurship Courses, and should satisfy all of the Graduate Attributes (GAs) specified in Table D-1 of the “Entrepreneurship Courses” listed as “Liberal Arts and Basic Science Courses” in the Guide to Graduate Education and International Graduate Program, as well as shown below. Students will be evaluated in regards to GA achievements at the time of their degree completion. For courses with two GAs, both GAs stipulated for the courses are considered to be acquired if students attain the corresponding credits for those courses.

Entrepreneurship Courses and Major Courses that enable students to acquire GAs and are recognized as equivalent to Entrepreneurship Courses, offered by the Graduate Major, are listed in Table D3 below. Students can also acquire GAs and credits by taking the Entrepreneurship Courses offered by the Center for Entrepreneurship Education (CEE) listed as “Liberal Arts and Basic Science Courses” in the Guide to Graduate Education and International Graduate Program.

It must be noted that credits attained from courses that are recognized as Entrepreneurship Courses can be counted towards the completion requirements of the doctoral degree program, either for Major Courses or for Entrepreneurship Courses (not for both). Nevertheless, even in cases where credits pertaining to courses that are not considered as Entrepreneurship Courses are attained, the associated GAs may be considered by the Graduate Major to have been acquired.

For Graduate Attributes, refer to the Guide to Entrepreneurship Courses.

The Graduate Attributes of the Doctoral Degree Program are listed in Table D-1 as follows:

GA0D: You can clearly design your own career and contribute to realizing scientific, technological, or social innovation through a comprehensive understanding of the knowledge, skills, social responsibilities and ethics required to become an active member of academia and/or industry.

GA1D: You can lead in realizing scientific, technological, or social innovation by acquiring advanced leadership skills, entrepreneurship, knowledge and expertise, and by developing social responsibility necessary for materializing your designed career.

Table D3. Courses of the Graduate Major in Science and Technology for Health Care and Medicine recognized as equivalent to Career Development, and Entrepreneurship Courses

Course category	Course number	Course title		Credits	GA*	Learning goals	Comments
Courses that can be counted as Entrepreneurship Courses	STM.C631	○	★	STM International Internship	0-0-4	GA1D	B,C,D

<p>○: course from this major, ★: course given in English</p> <p>Credits in Entrepreneurship Courses must be attained from among the above-listed courses and those listed as such in the Liberal Arts and Basic Science Courses Guide.</p> <p>* GA: Graduate Attributes</p>								

The Center of Data Science and Artificial Intelligence may offer courses that are recognized as equivalent to Entrepreneurship Courses in addition to those listed as such under “Liberal Arts and Basic Science Courses” in the Guide to Graduate Education and International Graduate Program. For details about available courses or completion requirements, please refer to the study guide of the center that offers the relevant program.

8. Research Related to the Completion of Doctoral Theses

In the doctoral thesis research, in addition to problem-solving skills, we foster problem setting ability and improvement of communication skills in English. These are acquired in the process of setting and evaluating the results of the studies. An example of the flow of the doctoral thesis is shown below.

- Interim Presentation

It is important to conduct research systematically and check the progress to produce research results. Thus, students conduct Research Planning for Doctoral Thesis I in 4Q, and Research Planning for Doctoral Thesis II in 9Q-11Q.

- Judgement Criterion of the Final Defense of Doctoral Thesis

Those who wish to conduct the final defense of their doctoral thesis must undergo prior examination at Research Planning for Doctoral Thesis II and obtain the approval to apply for it.

- The Doctoral Thesis Review Criteria

The doctoral thesis must be a self-authored thesis written in English. The content of the thesis must have novelty, creativity, and sufficient academic value in the field of Science and Technology for Health Care and Medicine, and also major parts of the content must be published in international academic journals or the same level as the contents in international journals.

- The Doctoral Thesis Review Procedure

After passing the interim review, the thesis shall be submitted for oral presentation, followed by preliminary review and evaluation by the examiners. In the final review, the ability to understand the relevant field (including English proficiency) will be confirmed. The oral presentation of the doctoral thesis must be given in English.

STM Course Research Planning for Master Thesis/ Doctoral Thesis

★ Master's course student

* Please refer to the timetable posted on the following website for courses offered in other graduate majors within the standard study program.

(ENG) <https://www.titech.ac.jp/english/student/students/life/graduate-timetables>

※ 標準学修課程内の他コース開設専門科目は、H P 掲載の時間割等を参照してください。

(JPN) <https://www.titech.ac.jp/student/students/life/graduate-timetables>

* STM Seminar S1～F5 : Follow your academic supervisor's instructions.

※ 講究科目は、指導教員の指示に従ってください。

2. Remote Lecture by Zoom: Notice for Attendance

Zoomでの遠隔講義 受講に関する注意事項

* Please attend the remote lecture from your home or laboratory.

* Be aware that attending remote lectures on a smartphone may result in very high data usage charges.

* Lecture schedules are subject to change.

Please check the Science Tokyo website and contact from each course instructor or your academic supervisor to confirm your course schedule, including those yet to be determined.

* Your Science Tokyo student email address and the LMS will be used for information about remote lecture attendance and small test submissions. Please register for courses early to ensure you can check your email and access the LMS. Please follow the instructions provided by each course instructor for details.

(JPN)

- ・配信される講義を研究室・自宅等で受講して下さい。

- ・スマホ等での遠隔講義の受信は通信料が膨大になる可能性があります。注意してください。

- ・講義のスケジュールは変更になる可能性があります。

未定のものも含めて、東京科学大学のホームページ、各講義担当教員あるいは研究室指導教員からの連絡を確認して履修してください。

- ・遠隔講義の受講方法・小テストの提出方法など、東京科学大学の学生メールアドレスとLMSが活用されます。メールの確認やLMS等への登録のための早めの履修登録をお願いします。詳細は各講義担当教員の指示に従ってください。

Internship Courses

- STM.C431 Off Campus Training I of STM (0-0-1) About 1 week
- STM.C531 Off Campus Training II of STM (0-0-2) About 2 weeks
- STM.C532 Off Campus Training III of STM (0-0-4) 2.5 months or longer
- STM.C633 STM off-campus advanced training 1 of STM (0-0-1) About 1 week
- STM.C634 STM off-campus advanced training 2 of STM (0-0-2) About 2 weeks

Course description and aims (From the syllabus – common to all courses)

This course is designed to give students experiences in the social world at companies or institutes conducting research related to “Science and Technology for Health Care and Medicine.” It is necessary to discuss with the student’s supervisor to decide on the host agency for the off-campus training. The number of credits depends on the student’s working period at the host agency.

- STM.C631 STM International Internship (0-0-4) 2.5 months or longer

Course description and aims
This course is designed to give students experiences in the real world at domestic or international universities, companies, or institutes conducting research related to “Science and Technology for Health Care and Medicine.” It is necessary to discuss with the student’s supervisor to decide on the host agency.

- STM.C632 Research Working in Company of STM (0-2-2) (for Working Adults)

Course description and aims

Students who belong to companies or research institutions summarize and report on their activities related to the topics of “Science and Technology for Health Care and Medicine” at their off-campus institutions.

- STM.C635 Cooperative Education through Research Internships of STM (0-0-4)

This course is for a long-term (at least 2 months), research internship with an allowance for doctoral degree students as part of graduate school education.

When taking this course, be sure to refer to the "Cooperative Education through Research Internships," which is available at the Science Tokyo website under "For Current Students > Academic Life > Cooperative Education through Research Internships":

<https://www.titech.ac.jp/english/student/students/life/job-i>

Students who have been confirmed to have no problems with their study and research plans after prior consultation with their academic supervisor are eligible.

Course Enrollment

○ Important Notes

The content and purpose of the application will be examined to determine whether or not the application can be approved as an internship course. If the content of the internship is likely a part of job hunting, it may not be approved. If a contract cannot be concluded with the internship host, the activity cannot be approved as an internship course. For example,

- When the internship host may not agree to conclude a contract (e.g., the contract with an overseas company or institution is often difficult)

- When there is insufficient time to complete the conclusion of the contract before the start of the internship.
- If the internship host proposes significant changes to the contract template specified by Science Tokyo, which requires Science Tokyo to review the changes, and as a result, there is not sufficient time to finalize the contract before the start of the internship.

In principle, the student is responsible for negotiating the contract based on the contract template specified by Science Tokyo, but the STM office handles confirmation and coordination with the Science Tokyo Administration regarding any changes in the content, and for the subsequent conclusion of the contract.

① Before the Internship (at least 2 months)

- Register for the appropriate course(s) for the period (1-2Q or 3-4Q) on the Web Services for Students and Faculty.
- Submit the “**Application Form for STM Master’s/Doctoral Internship**” to the STM office after receiving approval from the Academic Supervisor. ※ Other required documents should also be attached.

② After the Internship (about 1 month)

- Submit the “**Report on STM Master’s/Doctoral Internship**” to the STM office after receiving approval from the Academic Supervisor. ※ Other required documents should also be attached.

③ The following procedures shall be followed for STM.C632 Research Working in Company

- Register for the appropriate course(s) for the period (1-2Q or 3-4Q) on the Web Services for Students and Faculty.
- Submit the “**Report on Research Working in Company**” to the STM office after receiving approval from the Academic Supervisor after one month of research work.

International Presentation Courses

- STM.C542 International Presentation I of STM (0-1-0)
- STM.C543 International Presentation II of STM (0-1-0)
- STM.C641 International Presentation III of STM (0-1-0)
- STM.C642 International Presentation IV of STM (0-1-0)

Course description and aims

The objective of this course is to cultivate international presentation (and discussion) skills through poster or oral presentations in English at international conferences based on specialized knowledge in the field of Science and Technology for Health Care and Medicine.

- ① Register for the appropriate course(s) for the period (1-2Q or 3-4Q) on the Web Services for Students and Faculty.
- ② Submit the “**Report on International Presentation**” to the STM office after receiving approval from the Academic Supervisor after one month of International presentation. ※ Other required documents should also be attached.

The prescribed form is available on the STM web site. (Access is limited to on-campus only)

This will be posted on the course website

In charge of these courses: Head of STM Graduate Major, (AY2025 Professor Nohiko Koshikawa)

※ Grades are determined after discussion and approval at the STM meeting, so there may be a delay when grades are available.

人間医療科学技術コースインターンシップ科目 履修案内

Information on internship STM courses

科目について

修士課程

OSTM.C431「人間医療科学技術学外研修第一」(0-0-1)	1週間程度
OSTM.C531「人間医療科学技術学外研修第二」(0-0-2)	2週間程度
OSTM.C532「人間医療科学技術学外研修第三」(0-0-4)	2.5か月以上
講義の概要とねらい(シラバスより-全科目共通)	

人間医療科学技術に関係の深い企業・研究機関等において、実社会を体験することの有意義性を認め、奨励する。
学外研修先を決定する際には、**事前に指導教員等と十分な打ち合わせを行うことが必要である**。取得単位数に応じた研修期間を設定する。

博士課程

OSTM.C633「人間医療科学技術実践研修第一」(0-0-1)	1週間程度
OSTM.C634「人間医療科学技術実践研修第二」(0-0-2)	2週間程度
講義の概要とねらい(シラバスより-全科目共通)	

人間医療科学技術に関係の深い企業・研究機関等において、実社会を体験することの有意義性を認め、奨励する。
学外研修先を決定する際には、**事前に指導教員等と十分な打ち合わせを行うことが必要である**。取得単位数に応じた研修期間を設定する。

OSTM.C631「STM International Internship」(0-0-4)	2.5か月以上
講義の概要とねらい(シラバスより)	

国内外を問わず人間医療科学技術に関係の深い大学・企業・研究機関等において、実社会を体験することの有意義性を認め、奨励する。**インターンシップ先を決定する際には、事前に指導教員等と十分な打ち合わせを行うことが必要である**。

OSTM.C632「人間医療科学技術企業実習」(0-2-2)(博士課程社会人対象)
講義の概要とねらい(シラバスより)

企業等に所属している学生が所属する学外機関における人間医療科学技術に関連する実際の活動内容をまとめ、報告する。

OSTM.C635「ジョブ型研究インターンシップ(人間医療科学技術コース)」
講義の概要とねらい(シラバスより)

指導教員と事前協議の上、学修計画及び研究計画等に支障のないことが確認された学生を対象とする。

本科目を履修する際には、本学Webページの

「在学生向け>授業・履修>ジョブ型研究インターンシップ」

<https://www.titech.ac.jp/student/students/life/job-i>

に掲載の「ジョブ型研究インターンシップについて」を必ず参照すること。

履修について

・重要

本コースでは、申請の内容や目的等を精査し、インターンシップ科目としての認定の可否を判定します。

就職活動に繋がるとされる内容等の場合は認定されない場合があるので留意すること。

インターンシップ先との契約書及び覚書の締結が不可の場合はインターンシップ科目としては認定できません。以下のようないケースがあります。

- ・インターンシップ先の事情により締結できない場合(海外企業、機関との契約は非常に困難)
- ・締結がインターンシップ開始前までに完了できない、あるいは完了できないと見込まれる場合
- ・本学で決めたひな型に対して、インターンシップ先が大幅な変更を申し出た場合、大学側での検討が必要となり、結果的にインターンシップ開始前までに締結が完了できない場合

なお、本学のひな型に基づく契約書及び覚書の交渉については、原則として履修者本人に行っていただきますが、内容の変更等に関する大学への確認作業及びその調整、その後の締結作業はSTMコース支援事務が担当します。

① インターンシップ前

- ・教務Web上より、実施した期間に応じた科目(1-2Qあるいは3-4Q)を履修登録をする。

- ・インターンシップ先が企業や研究機関等の場合、本学との契約が必要となるため、インターンシップ開始の遅くとも**2か月前までに**所定様式「人間医療科学技術コース 修士／博士インターンシップ申請書」により申請をする。
(指導教員確認後、研究室または本人からSTMコース支援事務へ提出)
※様式には必要な添付書類等が記載されているので、添付漏れ等の不備がないように注意すること。
- ・学研災・学研賠の加入が必要

② インターンシップ終了後1か月以内を目安に

- ・所定様式「人間医療科学技術コース 修士／博士インターンシップ報告書」により報告する。(指導教員確認後、研究室または本人からSTMコース支援事務へ提出)
※様式には必要な添付書類等が記載されているので、添付漏れ等の不備がないように注意すること。

③ 「人間医療科学技術企業実習」のみ以下のとおり

- ・教務Web上より、実習期間に応じた科目(1-2Qあるいは3-4Q)を履修登録する。
- ・実習終了後1か月以内を目安に、所定様式「人間医療科学技術企業実習 報告書」により報告する。(指導教員確認後、研究室または本人からSTMコース支援事務へ提出)

人間医療科学技術コース国際プレゼンテーション科目 履修案内

Information on International Presentation

科目について

修士課程

OSTM.C542「International Presentation I of STM」

OSTM.C543「International Presentation II of STM」

講義の概要とねらい(シラバスより-全科目共通)

人間医療科学技術コースの専門性を基礎として、国際会議における英語による口頭発表もしくはポスター発表を行い、国際プレゼンテーション力を養う。

博士課程

OSTM.C641「International Presentation III of STM」

OSTM.C642「International Presentation IV of STM」

講義の概要とねらい(シラバスより-全科目共通)

人間医療科学技術コースの専門性を基礎として、国際会議における英語による口頭発表もしくはポスター発表を行い、国際プレゼンテーション力を養う。さらに発表における質疑応答を通して英語でのディスカッション力を養う。

① 教務Web上より履修登録する。

② 国際学会・会議に参加後

- ・所定様式「人間医療科学技術国際プレゼンテーション報告書」により報告する。

(指導教員確認後、研究室または本人からSTMコース支援事務へ提出)

※様式には必要な添付書類等が記載されているので、添付漏れ等の不備がないように注意すること。

所定様式はSTMコースWebサイトに掲載する予定です。(アクセスは学内限定)

または担当・問い合わせ先にメールにより請求してください。その際、件名に「○○○様式希望」と記入してください(○○○には、上記の該当する様式名を記入してください。)

なお、これらの科目の担当教員はすべてコース主任(2025年度は越川直彦教授)となります。

※コース内会議で審議・認定後に成績が決定するため、成績を確認できる時期が遅くなることがあります。

人間医療科学技術コース

「人間医療科学技術特別講義第一」

－ 生命がもつ遺伝子とゲノムの理解と制御、そして疾病の発症 －

STM. C406 日本語開講・対面講義（G1 棟の講義室の予定）

概要

本講義では、環境微生物が持つ多様な遺伝子機能の進化的背景から、微生物ゲノムの合成生物学的活用、そしてヒトの疾患に関わるゲノム構造異常の分子機構まで、現代の分子生命科学の最前線を幅広く学びます。分子進化、ゲノム解析、バイオインフォマティクス、合成生物学に加え、疾患の発症機構やゲノム医療に関心のある方にとっても、貴重な学びの場となるはずです。

日程と担当教員：

10月20日（月）5-8 限

石川 聖人 先生（長浜バイオ大学 バイオサイエンス学部 准教授）

「細菌の生物機能とその利用」

10月27日（月）5-8 限

モリテツシ 先生（東京農工大学 工学研究院 准教授）

「環境微生物の利活用を支える技術的進展」

11月10日（月）5-10 限

畠山 慶一 先生（静岡県立静岡がんセンター 研究所 ゲノム解析研究部 部長）

「ゲノム解析に支えられるがんゲノム医療の実際と今後の展望と課題」

*すずかけ台キャンパス講義室（詳細未定）にて対面で実施し、グループワークを実施することがあります。

履修登録者は全 7 回（3 日間）の講義を受講してください。

講義は日本語で行われます。

連絡教員 田中 祐圭（tanaka.m@mct.isct.ac.jp）

人間医療科学技術コース

「人間医療科学技術特別講義第二」

－ 生体反応の情報を生いた認知行動評価 －

STM. C407 日本語開講・オンライン講義

概要

本講義では、生体反応の情報を生いた認知行動評価について、研究事例を基に可能性や問題点を検討します。これらの事例を基に、新たな認知行動の評価可能性を設計する演習を行います。

講師

中山実 名誉教授

日程と講義内容：

(1) 12月5日(金) 5,6限：眼球運動計測の応用事例

一般的な眼球運動研究、診断評価事例など

(2) 12月12日(金) 5,6限：眼球運動による運転行動の評価

自動車運転、flight operation などの研究事例

(3) 12月19日(金) 5,6限：瞳孔を用いた行動評価

情動応答、認知負荷による反応分析

(4) 12月26日(金) 5,6限：瞳孔による眼疾患の検討

AMD や認知機能と瞳孔応答に関する検討

(5) 1月9日(金) 5,6限：脳波を用いた行動評価

視覚情報、情動、認知機能による脳波変化

(6) 1月30日(金) 5,6限：言語情報や学習行動の評価事例

言語情報分析の基礎、学習理解や Nursing note 分析

(7) 2月6日(金) 5,6限：認知行動の評価演習

各自の興味に基づいた提案内容の相互評価

*ZOOM で実施し、グループワークを実施することがあります。

履修登録者は全 7 回（7 日間）の講義を受講してください。

講義は日本語で行われます。

連絡教員 田原麻梨江 (tabaru.m.9f4b@m.isct.ac.jp)

修士課程学生用/For Master's Students

研究倫理教育について（修士課程） / Research ethics education (Master)

人間医療科学技術コース（理工学系）修士課程学生 各位
To Master's students of STM (Science and engineering fields)

人間医療科学技術コース（理工学系）（レベル2）
Science and Technology for Health Care and Medicine Course Science and engineering fields
(Level 2)

本学が研究大学としてさらに発展をするために研究公正を推進することが不可欠となっており、全学生に対して研究倫理教育を実施することとなっています。下記に示した項目および科目には、東京科学大学生として身に付けるべき倫理の内容が含まれています。これらの科目の学修を通じて倫理を身に付けてください（本レベル2はB4～M2 が対象学年です）。

To further develop our university as a research institution, it is essential to promote research integrity. Accordingly, research ethics education will be provided to all students. The items and subjects listed below include the contents of the ethics to be acquired as Science Tokyo students. Please learn about ethics through these subjects. (This level 2 is for B4-M2).

基本的な質問にお答えします！ What is entrepreneurship and how is it useful?
How many credits are required? What kind of courses are available?
We'll answer your basic questions!

Benefits

- Developing your **logical thinking, critical thinking, and problem-solving skills**, and enabling you to understand **the process of creating new value**
- Training your creativity, while providing the **enjoyment of research** and a **broad perspective** on technology in relation to society
- Helping you gain self-confidence to **work independently** regardless of field, a **wider range of career path options**, and greater chances of finding satisfying and rewarding jobs and success.

Changes in the perception of doctoral degrees

With the goal of **taking advantage of scientific and technological progress**, and **developing capabilities for creating new industries**, the **expectations** for individuals with doctoral degrees are growing. Their advanced sci-tech knowledge, as well as **problem-finding and -solving skills** are sought after by society.

After completing doctoral programs, a **wide range of career paths** can be considered – doctoral graduates work as scientists at higher education or research institutions, active players in companies, entrepreneurs, bureaucrats, politicians, etc. In particular, they are becoming more active in R&D companies.

First occupations for science and engineering doctoral graduates

MEXT-NISTP "Japanese Science and
Technology Indicators 2025"

Three Takuetsu Programs

Financial support for doctoral students

At Science Tokyo, almost all doctoral students receive financial support from public or private entities. The TAC-MI, WISE-SSS, and ISE academies engaging in Takuetsu programs offer students opportunities for financial support.

Takuetsu programs and academies

As part of efforts to foster outstanding doctoral graduates, Science Tokyo has established the aforementioned three academies that function **across academic disciplines at the Institute**, and enable **seamless transition between master's and doctoral degree programs**. With the objective of developing students' abilities and skills required to **create new value and solve social problems**, these academies offer unique programs. They aim to promote **interdisciplinary research**, and encourage **personnel exchanges** among various organizations such as industrial entities, national institutions, and overseas institutions, while placing value on laboratory work and activities.

Takuetsu programs are waiting to welcome you!

Academy for
Convergence of Materials
and Informatics (TAC-MI)

Academy of Super
Smart Society (WISE-
SSS)

Academy of Energy and
Informatics (ISE)

* The enrollment examination for the TAC-MI program ended in AY2023
Applications for WISE-SSS closed as of August 2025.

■ **Joint briefing session of the three academies for Takuetsu programs**
October 29th, 2025 (Wed) 15:00-16:30 (Online) *in Japanese only*

Details here ▶

* Takuetsu programs: Programs offered by the TAC-MI, WISE-SSS, and ISE academies are supported by MEXT's Doctoral Degree Program for World-leading Innovative & Smart Education (WISE Program). They are commonly called *Takuetsu* (卓越 in Japanese, meaning excellence or superiority) programs.

Features

- ✓ Integrated Master's and Doctoral program
- ✓ Financial support
- ✓ Open for all courses

Academy of Energy and Informatics

■ Expectations ■

Create, design and lead the future society
Multi-Scope · Energy WISE Professionals

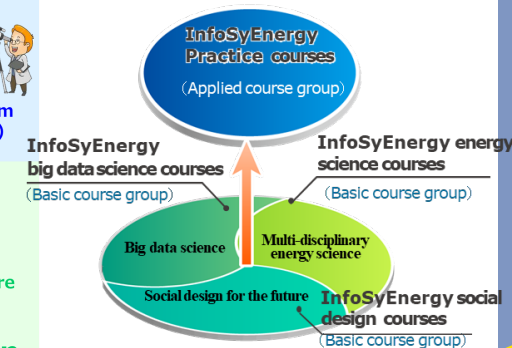

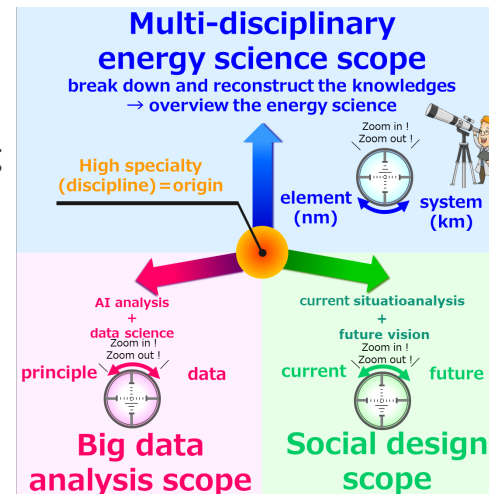

“Professionals” with “Multi-disciplinary energy science scope” applied by
= “Big Data Science” (AI analysis + Data science)
who can design a new sustainable energy

Our Efforts

- Hitotsubashi University’s cooperation by providing knowledges of social science, educational skills and professional skills
- Utilization of energy big-data in smart energy system developed and demonstrated at Science Tokyo
- Collaboration with consortium members of 27 companies, 6 public institutes and 16 world’s leading universities
- Cultivating abilities of flexibly handling on the site and finding problems by providing internship and co-research programs with domestic/overseas companies and universities
- Constructing a global human network centered on doctoral students by participating in various events such as cutting-edge research workshops and exchange events with consortium member companies and overseas universities
- The business and international mentorship system will help students develop multifaceted viewpoints

Our Curriculum

Cultivate “3 scopes” by “4 course groups” collaborating with “InfoSyEnergy Research and Education Consortium”

- Over 70 Professors/Assoc. Professors participating from across all of Science Tokyo’s schools
- Organized into nine areas, teams design and conduct collaborative research
- “Multi-scope” energy education through academia-industry cooperation
- Strategic student-industry matching, and a recurrent education system

The Aim of InfoSyEnergy

[Synergistic effects from integrated promotion of “energy device development” and “system development”
Campus system technology developed and demonstrated at Science Tokyo

博士後期課程への進学

博士後期課程に進学するメリット

- 博士後期課程では、課題設定や問題解決のための論理的な考え方を学ぶことができ、「新しい価値を創出するプロセス」を体得することができます。
- 研究を楽しみつつ進めることにより、社会の中における技術を高い視点から俯瞰して見られるようになり、創造力の鍛錬が行われます。
- 様々な分野で独り立ちできる自信がつき、その後のキャリアパスの選択肢が広がります。やりがいのある仕事に恵まれる可能性が高く、活躍のチャンスを増やすことができます。

社会の「博士」に対する見方の変化

科学技術の高度化への対応、産業創出力の強化といった観点から、現在、社会では「博士」に対して、科学技術に対する高度な理解力を有する「課題発見・解決のプロフェッショナル」としての期待が高まっています。博士後期課程修了後も、幅広いキャリアパスが考えられます。

大学や研究機関で活躍する科学者になる、企業に入って活躍する、起業する、官僚や政治家として活躍するのも良いでしょう。研究開発型の企業においては、博士が活躍する場面が広がっています。

出典：文部科学省 科学技術・学術政策研究所 「科学技術指標2025」

3つの卓越教育課程

博士後期課程学生への経済的支援の一つの取り組み

本学では、博士後期課程に在籍するほぼ全ての学生が、つばめ博士学生奨学金や博士後期課程学生向けプログラム、日本学術振興会、民間企業・財団などから経済的支援を受けています。

本学の取り組みの一つに、卓越した博士人材を育成する、**全学横断型の修博一貫の大学院教育プログラム**として、**3つの卓越教育課程**があります。

卓越教育院は、**経済的支援**を行いながら、学生の研究室での研究活動も大切にしつつ、**異分野融合研究**、産業界・国立機関・海外機関との**人材交流**等の様々なイベントを通して、**新たな価値の創造による社会課題を解決**する人材を養成します。

皆さん、これから本学の**卓越教育院**と一緒に学んでみませんか？

■目指す人材像■

未来社会を創造・デザイン・牽引する
マルチスコープ・エネルギー卓越人材

=

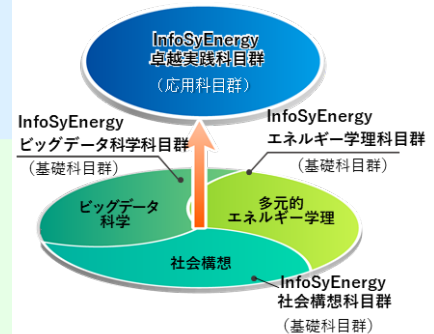

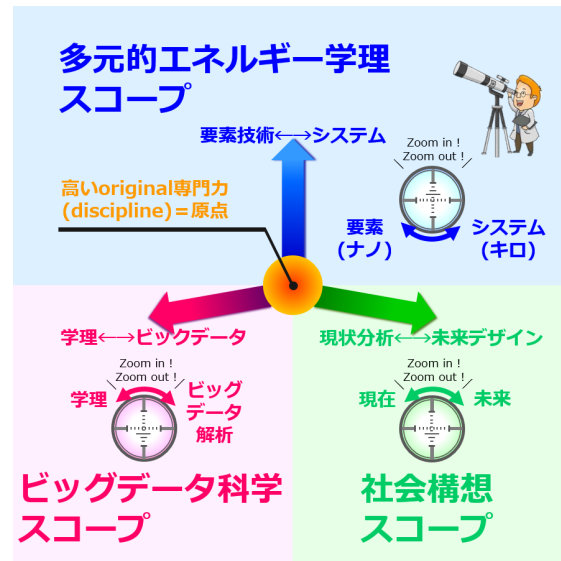

“ビッグデータ科学”（AI解析+データ科学）を
活用したマルチスコープで新しい持続可能な
エネルギー社会をデザインする人材

教育院の取り組み

- 一橋大学からの社会科学、教育力、専門力の提供
- 本学開発実装のスマートエネルギーシステムにおけるエネルギービッグデータの活用。
- コンソーシアムの会員である**27**の企業、**7**の公的機関、**16**の世界トップ大学との協業。
- 国内外の企業、大学等での共同研究、インターンシップ経験を通じ、現場対応能力、問題発見能力を涵養する。
- 最先端の研究ワークショップや会員企業・海外大学との交流イベント、国際フォーラムなどへの参加を通じ、博士学生を中心とするグローバルな人的ネットワークを構築する。
- 企業メンター・国際メンター制度を導入し、多角的な視野を養成する。

教育課程

- 「4つの科目群」による教育課程、「InfoSyEnergy研究/教育コンソーシアム」との協業により3つのスコープ力を涵養

コンソーシアムの目指すもの

「エネルギーデバイス開発」と「システム開発」を
一体で推進することによるシナジー効果

- 各学院横断で全学から教授・准教授**70**名以上が参画
- 主要**9**部門を編成し、チーム型産学共同研究を提案、推進
- 「未来のエネルギー社会をデザインする人材」を産学協働で育成
- 学生と企業の人材戦略のマッチング、体系的リカレント教育の実現

本学の様々なエネルギーデバイス・要素技術

本学で開発、実証されるキャンパスシステム技術

You can return books at either Ookayama or Suzukakedai Library.

Library Counter at 1st floor

Book return bin at the entrance

Attention

If you miss the due date, **you will not be able to borrow, renew, or reserve any books** as many days as the book is overdue.

Other Services

- **Reserve**

You can reserve checked-out book.

- **Order**

You can order books from the Ookayama Library.

*From October 2025 a delivery service is being between Ookayama Library, Suzukakedai Library, Ochanomizu Library, and Konodai Library. For more information→

- **ILL (Interlibrary Loan)**

You can order materials from the other libraries.

All the services above are available online

- **Electronic Materials and Databases**

You can use E-Journals, E-Books and databases from your home .
For more information→

Library Web Site

The screenshot shows the library website interface. At the top left is the logo for '大岡山図書館 すずかけ台図書館' (Ookayama Library and Suzukakedai Library). To the right are links for 'Online Request' (highlighted with a red box), '日本語' (Japanese), and the 'Institute of SCIENCE TOKYO' logo. Below these are links for 'Access' and 'Sitemap', and a search bar labeled 'Search this site'. A teal navigation bar contains 'Services' (highlighted with a red box), 'Search & Find', 'Learning & Research Support', and 'Contact Us'. The main content area features a large teal box for the 'Library Catalog' (highlighted with a green box) with a search input and a 'search' button. Below the catalog are links for 'E-Journals, E-Books' (highlighted with a blue box) and 'Databases' (highlighted with a yellow box). A red line connects the 'Online Request' link to a pink box labeled 'Online Request'. A green line connects the 'Library Catalog' link to a green box labeled 'Library Catalog'. A blue line connects the 'E-Journals, E-Books' link to a light blue box labeled 'E-Journals & E-Books'. A yellow line connects the 'Databases' link to a yellow box labeled 'Databases (Available in campus network)'.

Online Request

✓ Register your e-mail

The screenshot shows the 'Online Request' website. At the top, there are links for 'Help', 'Ask Online', and 'FAQ', along with a '日本語' button and 'Font size' options (small, medium, large). The main navigation bar is teal and contains links for 'Home', 'Your Profile Confirm/Change', 'Borrowing Status, Reservation and Renewing' (with a dropdown arrow), and 'Ordering Articles/Interlibrary Loan'. Below this, there are more links: 'Recommending / Requesting Books' (with a dropdown arrow), 'Book Review' (with a dropdown arrow), 'Reading Record List', and 'Reserving facilities (link to Web system for S&F)'. The main content area is titled 'Information from library' and contains several bullet points. Three orange callout boxes with arrows point to specific features: the first points to the 'Your Profile Confirm/Change' link; the second points to the 'Borrowing Status, Reservation and Renewing' dropdown; the third points to the 'Ordering Articles/Interlibrary Loan' link.

Information from library

- Notice of the fiscal year-end closing for Ordering Articles and Interlibrary Loan service (public expenditure)
For the following requests, the fees will be deducted from the next fiscal year's budget.
• Photocopying charges from April 1, 2025
- The photocopying charges at the Okayama and Suzukakedai Libraries from October 2024 are as follows.
Details: [Photocopying charges from October 2024](#)
- [Important / Students who cannot use a public expense] Library's ILL cost-covering service is changed since April 2024.
Details: [FY 2024 Budgeting and Accounting Information](#)
- From October 2024, the number of books that can be borrowed at the same time will be increased to 5 books at the same time.
Details: [Details of the change](#)

✓ Check materials you have checked out
✓ You can renew an item up to three times if it hasn't been reserved

✓ Order materials from other campus [paid service] and other university libraries

Agreements on Tokyo Tech Information and Communication Infrastructure

On the use of Tokyo Tech Information infrastructure, I will obey "the Tokyo Tech Information Ethics Policy & the Tokyo Tech Security Policy" given in Guidelines for Information Ethics and Security, the Guideline for the Tokyo Tech Information Infrastructure Use and Dealing with Communication Records.

Please be sure to update the certificate management tool to do IC card authentication after you renewed your IC card.

Agree (PKI Auth.)

IC card authentication (See the manual for setting up)

Agree (Matrix / OTP / Soft Token Auth.)

Matrixcode, One-Time Password(OTP) or Soft Token authentication

*For those who forget a password of Matrix/OTP Auth., please refer to this page.

Guideline for the Tokyo Tech Information Infrastructure Use

Those who violate the following regulation, will be temporarily suspended from using Tokyo Tech Information Infrastructure. The countermeasure against the violation will be finalized by the Tokyo Tech Information Ethics Committee.

1. Do not lend or share login or authentication information (login ID, password, matrix, etc.) with others;

2. Make sure that there is no security problem when connecting your computer to Tokyo Tech Information Infrastructure;

3. Do not take any action that overloads Tokyo Tech Information Infrastructure;

4. Do not use P2P software or equivalents for communication;

5. Do not carry out intentional cyber attacks;

6. Do not violate Intellectual Property Rights;

Important Notice

On-campus access (SSL-VPN)

Using SSL-VPN

Using SSL-VPN

This page explains how to get off-campus access to the Tokyo Institute of Technology network over SSL-VPN.

Notes

- Disable the Pop-up Blocker.
- The number of SSL-VPN access at the same time is limited, so please use it with restraint.
- Note that the system will apply usage restrictions if it detects file conversion software transmissions while the connection is active.
- Electronic journals are prohibited from systematic and excessive downloading. In addition, those who have an Access Card but Research Fellowship for Young Scientists belonged to Japan Society for the Promotion of Science cannot use electronic journals.

Contents

1. Available operating systems/browsers
2. Procedures for Windows
3. Procedures for macOS
4. Procedures for iOS/Android
5. Ports that can be used for an SSL-VPN connection

1. Available operating systems/browsers

OS	Browser	Notes
Windows 10, 11	Edge, Google Chrome, Firefox	
macOS	Safari, Google Chrome, Firefox	
iOS/Android		Application is needed

On-campus access (SSL-VPN)

Using SSL-VPN

2. Procedures for Windows

1. Click on the menu.

Campus Network SSL-VPN

Prohibited Matters on using electronic resources

Systematic or excessive downloading

There is a possibility that access is suspended for the entire institution.

東京科学大学情報基盤利用承諾

東京科学大学の情報基盤を利用するにあたり、本学の「情報倫理とセキュリティのためのガイド」に記載の本学情報倫理ポリシー及び情報セキュリティポリシーならびに下記の「東京科学大学理工学系 情報基盤利用ガイドライン」、「通信記録の取り扱い」をよく理解し、情報環境を乱すことのないよう良識に基づいた節度ある利用を行うことに同意します。

更新したICカードで証明書認証を行うには証明書管理ツールのアップデートをお願いします

同意（証明書認証）

ICカードリーダー(設定必要)とICカードでログイン

同意（マトリクス/OTP/ソフトトークン認証）

マトリクスコード、ワンタイムパスワード(OTP)またはソフトトークンでログイン

※マトリクス認証のパスワードを忘れた方はこちらをご参照下さい。

東京科学大学理工学系 情報基盤利用ガイドライン

次の事項の違反者に対しては、東京科学大学理工学系 情報基盤の利用を一時停止し、その後の対応は全学または部局等の情報倫理委員会に委ねる。

1. ログイン情報・認証情報(ログインID、パスワード、マトリクス等)の貸借や他者との共用を行わない。

2. 端末を東京科学大学理工学系 情報基盤に接続する際に、セキュリティ上の問題がないか十分確認する。

3. 東京科学大学理工学系 情報基盤に過剰な負荷を与える行為を行わない。

4. P2Pソフトウェアおよびそれと同等の通信を行うソフトウェアを利用しない。

5. 不正な攻撃は行わない。

6. 著作権を侵害しない。

7. 名誉棄損・ハラスメントになる行為を行わない。

8. ネズミ講等の詐欺行為を行わない。

9. 公序良俗に反した行為を行わない。

修博一貫カリキュラム移行申請書

Application form for Seamless Transition Between Degree Programs

Date: 年 月 日
(yyy) / (mm) / (dd)

人間医療科学技術コース主任 殿

To the Head of Department in STM

入学年度/Year of Admission年度/AY

所 属/Affiliation学院/School
.....系/Department

Graduate Major in Science and Technology for Health Care and Medicine

学籍番号/Student ID No.

氏 名/Name印/Seal

私は、博士後期課程への進学を希望しており、修博一貫カリキュラムへの移行を申請しますので、許可くださるようお願いいたします。

I hereby request to apply the Seamless Transition Between Degree Programs, because I hope to go to Doctoral degree program.

指導教員承認/Name(s) and seal(s) of academic supervisor(s)

(押印不要)

主)

副)

事務使用欄

受付日	発表日	評価	備 考

STM Graduate Major (Science and engineering fields)
Taking 600-level courses in the Master's degree program

- 1) Students are generally not allowed to take 600-level liberal arts and career courses.
 - 2) Major courses in 600-level, other than 1).
 - A student can take the courses after completion of the research plan presentation and approval by the STM faculty committee.
 - Students who wish to take these courses must submit "Application form for Seamless Transition Between Degree Programs" prior to the presentation of "Research Planning for Master Thesis I of STM." If the student passes the evaluation at the presentation, one can take 600-level courses.
 - After the acquisition of the credits, they will be listed on the transcript of the Master's program, but will not be counted as the credits toward the Master's degree completion requirements.
 - After enrolling in the doctoral program, the student should complete the accreditation procedure so that the credits can be treated as the ones for the completion of the doctoral program.
-
- ✧ Students in the IGP-A Integrated Master's and Doctoral Degree are automatically evaluated without submitting the Application form for Seamless Transition Between Degree Programs in "Research Planning for Master Thesis I of STM."
 - ✧ If a student does not submit the "Application form for Seamless Transition Between Degree Programs" and does not pass the evaluation by STM, one will not be allowed to take 600-level courses during the Master's program. (Even if the course is accidentally approved due to a procedural error, the student will not be able to receive credits after entering the doctoral program.)

人間医療科学技術コース(理工学系)

修士課程における 600 番台科目の履修について

(1) 600 番台の文系教養科目、キャリア科目は原則として履修することはできません。

(2) 600 番台の専門科目、(1)以外の科目

- ・ 研究構想発表を終え、コースが認めた場合には履修可能です。
- ・ 履修を希望する学生は、「修士論文研究計画論第一」の発表会に先立ち「修博一貫カリキュラム移行申請書」を提出してください。発表会での審査で合格すれば 600 番台科目の履修が可能です。
- ・ 修得後は、修士課程の成績証明書には記載されますが、修士の修了要件単位にはなりません。
- ・ 博士後期課程進学後に認定手続きを行うことで、博士後期課程の修了要件単位として扱うことができます。

※ IGP-A の修博一貫プログラムの学生は、「修士論文研究計画論第一」における「修博一貫カリキュラム移行申請書」を提出しなくても自動的に審査が行われます。

※ 「修博一貫カリキュラム移行申請書」を提出していない場合、600 番台科目の履修は不許可となります。(仮に手続きミス等により許可となっても、博士後期課程進学後に単位認定を行うことはできません)

Financial support for doctoral students (external)

1. Scholarship

Scholarships for international students

Non-Japanese students attending Science Tokyo at their own expense are eligible to apply for two types of scholarships from private scholarship foundations. The procedure for applying for each of these private scholarships is different. In one case, the student can apply directly for the scholarship without any recommendation from the University. In the second case, a recommendation from the University is required.

2. Japan Society for the Promotion of Science (JSPS) Research Fellowship for Young Scientists

(1) Doctoral Course Students (DC)

- Monthly stipend: 200,000 yen / research grant (Grant-in-Aid for JSPS Fellows): up to 1,500,000 yen/year
- There are restrictions on income from part-time jobs and scholarships.

(2) Overseas Challenge Program for Young Researchers

- Support for research study abroad expenses (travel, accommodation, and research expenses) is available while enrolled in the Doctoral Program.

Financial support for doctoral students (internal)

Title	Financial resources	Annual payment per person	Remarks
Tsubame Scholarship for Doctoral Students (Tsubame Scholarship)	Science Tokyo	480,000 yen/year (standard) 635,400 yen/year (special)	"Science Tokyo SPRING", "Science Tokyo BOOST" and "JSPS Doctoral Course (DC) Fellowships" students are not eligible for support.
Program for Development of Next-Generation Front-Runners with Comprehensive Knowledge and Humanity (Science and Engineering fields) (Science Tokyo SPRING (SE))	JST	2,160,000 yen/year Research expenses 300,000 yen/year (max) Support for travel expenses for off-campus study	Student recruitment will be conducted as follows 1. Recruitment for new doctoral students (spring and fall) 2. Recruitment for master's students who wish to enter the doctoral program in the spring of the next year (Program Slots Offer in Advance)
Program for Development of Co-creative Experts towards Top-level AI Research (Science and Engineering fields) (Science Tokyo Boost (SE))	JST	3,600,000 yen/year Research expenses 300,000 yen/year (max) Support for travel expenses for off-campus study	Student recruitment will be conducted as follows • Recruitment for new doctoral students (spring and fall)
Research Fellow (Institute of Integrated Research)	Science Tokyo	840,000 yen/year	RA equivalent "Science Tokyo SPRING", "Science Tokyo BOOST" and "JSPS Doctoral Course (DC) Fellowships" students are not eligible for support.
School of Life Science and Technology Bio × Digital Financial Support Program	Science Tokyo	155,400 yen/year	• Students who are motivated to engage in bio digital studies. • There are additional eligibility

Financial support for doctoral students (internal)

Title	Financial resources	Annual payment per person	Remarks
Tuition Exemption 【 JSPS Research Fellowship for Young Scientists (DC) 】	Science Tokyo	Full exemption	Starting October 2024

TA / RA opportunities are also available: <http://www.jinjika.jim.titech.ac.jp/syoku/index.html> (Japanese only)
Information is correct at the time of publication. Please check individual websites as required for updates.

Financial support through educational programs for doctoral students

Title	Financial resources	Annual payment per person	Remarks
<p>Financial support of WISE Program (Doctoral Program for World-leading Innovative & Smart Education)</p> <p>✓ Academy of Energy and Informatics (InfoSyEnergy)</p>	<p>Sponsorship, donations, joint research funds, etc.</p>	<p>About 1,700,000 yen/year</p> <p>Can be provided along with the Tsubame Scholarship (standard) for a total amount of approx. <u>2,200,000 yen/year</u> of support:</p> <p>In addition, there are various types of support for research expenses and travel expenses.</p>	<p>You can apply for “Science Tokyo SPRING(SE)” or “Science Tokyo BOOST(SE)”.</p> <p>Note: Support details for FY2027 and beyond have not yet been determined. Please be sure to check the details.</p>

Websites with information about the doctoral program

Prospective Students

<https://www.titech.ac.jp/english/0/prospective-students/domestic>

Career Support Events

Career-related events of the Student Support Center at the University are held only in Japanese, so please confirm details on the Japanese page. On the other hand, you can receive career counseling in English.

<https://www.titech.ac.jp/english/student-support/students/career/events>

Cooperative Education through Research Internships

It is possible to earn credits in an internship at the same time while receiving a salary. Check the job description to see if you can make the most of your expertise.

<https://www.titech.ac.jp/english/student/students/life/job-i>

大学院課程学生への経済的支援（学外実施分）

1. 奨学金

（１）日本学生支援機構（JASSO）による貸与奨学金

種類	修士課程（月額）	博士後期課程（月額）
第一種奨学金（無利子）	5万円、8.8万円から選択	8万円、12.2万円から選択
第二種奨学金（有利子）	5万円、8万円、10万円、13万円、15万円から選択	

（２）民間財団等による奨学金（日本人学生向け）

- ・大学推薦なしで直接申請できる奨学金と、大学推薦必要な奨学金あり。
- ・地方公共団体の貸与奨学金（返還必要・無利子）と、民間の給与奨学金（返還不要）、貸与奨学金（返還必要・多くが無利子）がある。

（３）民間財団等による奨学金（私費外国人留学生向け）

- ・「大学推薦」は、学生支援課で登録申請必要。推薦学生を選出。
- ・「直接応募」は、大学ウェブサイトに掲載。各自で応募。

2. 日本学術振興会による制度・プログラム

（１）「特別研究員(DC)」制度

- ・研究奨励金20万円/月と特別研究員奨励費（研究費）～150万円/年。アルバイトや奨学金制限有

（２）若手研究者海外挑戦プログラム

- ・博士後期課程在籍中に研究留学経費の支援（渡航費・滞在費・研究費）

大学院課程学生への経済支援（学内実施分）

名称	財源	一人当たりの年間支援額	備考
つばめ博士学生奨学金	東京科学大学 （大学経費）	480,000円（一般奨学金） 635,400円（特別奨学金）	SPRING、BOOST、DCの採択者等は支援対象外
総合知と癒しの次世代フロンティアランナー育成プログラム（理工学系） （Science Tokyo SPRING(SE)）	科学技術振興機構 （次世代研究者挑戦的研究プログラム／SPRING）	・ 216万円/年（18万円/月） + 研究費 30万円/年 + 学外研鑽費用支援	新入生を対象とした募集（入学後採用(春／秋)）と本学修士学生のうち翌年度春入学希望者を対象とした募集（予約採用）を実施
トップレベルAI研究のための共創型エキスパート人材育成プログラム（理工学系） （Science Tokyo BOOST(SE)）	科学技術振興機構 （次世代AI人材育成プログラム(博士後期課程学生支援)／BOOST）	・ 360万円/年（30万円/月） + 研究費 30万円/年 + 学外研鑽費用支援	新入生を対象とした募集（入学後採用(春／秋)）を実施
リサーチフェロー制度 （総合研究院）	東京科学大学 （大学経費）	84万円/年	RA相当 SPRING、BOOST、DCの採択者等は支援対象外
生命理工学院バイオ×デジタル学修支援金制度	東京科学大学 （大学経費）	155,400円/年	バイオデジタル学修に意欲のある学生対象 その他支給要件あり

大学院課程学生への経済支援（学内実施分）

名称	財源	一人当たりの年間支援額	備考
東工大基金奨学金	東京科学大学 （大学経費）	『青木朗記念奨学金』 ※5万円/月 『高砂熱学工業 創立100周年記念奨学金』 ※5万円/月 『Air Trunk奨学金』 5万円/月	一部所得制限有
授業料免除【日本学術振興会特別研究員（DC）採用者】	東京科学大学 （大学経費）	授業料全額免除	2024年度後学期より 実施

※印：修士課程学生への支援 無印：博士後期課程学生への支援

- ・ 上記以外の東工大基金奨学金については、HPをご確認ください。
<https://www.titech.ac.jp/student-support/students/tuition/giving-scholarships>
- ・ この他、TA/RAがあります。<http://www.jinjika.jim.titech.ac.jp/syoku/index.html>
- ・ 現時点での支援です。変更もあるので、詳細は各ホームページ等を確認してください。

博士後期課程学生への教育プログラムによる経済的支援

名称	財源	一人当たりの年間支援額	備考
卓越教育院経済支援制度 (エネルギー・情報卓越教育院)	協賛金，寄附金， 共同研究経費等	<ul style="list-style-type: none">・ 170万円程度/年（奨励金、RA給与等）つばめ博士学生奨学金の併給可 同奨学金（一般）を併給した場合 220万円程度/年・ 上記のほか、研究費、旅費支援等の 様々な支援あり	<p>「総合知と癒しの次世代フロンティア 育成プログラム（理工学系）」または 「トップレベルAI研究のための共創型エキ スパート人材育成プログラム（理工学 系）」に応募が可能です。</p> <p>注意：2027年度以降の支援内容は未定です。 必ず、詳細を確認してください。</p>

Security Export Control

- What is Security Export Control ?

Security Export Control is a framework, based on the Foreign Exchange and Foreign Trade Act (FEFTA)¹, to maintain international peace and security by preventing weapons² and goods and technologies that could potentially be used for military applications from falling into the hands of terrorists or states that may be a security risk.

¹ Penalties under FEFTA: 【Criminal Penalty】 *Imprisonment*: No more than 10 years; *Fines*: Individual No more than JPY 30 million, Company No more than JPY 1 billion 【Administrative Penalty】 Prohibition of exports for no more than 3 years

² “Weapons” means both conventional weapons and weapons of mass destruction (WMD), including nuclear weapons, chemical weapons, biological weapons, and missiles which carry WMD

- If you are thinking about doing any of the following activities, first consult with your academic supervisor. You may be required to follow Security Export Control procedures before proceeding.

1) Going overseas³

- Providing undisclosed technical information overseas
- Taking items (samples, equipment, USB memory) out of Japan
- * Check with your supervisor before sending items abroad. The value of the item is not relevant.

2) Communicating with those overseas³

- Transferring undisclosed technical information from your laboratory
- * Providing information via SNS is also subject to Security Export Control procedures.
- * Most laboratories prohibit the provision of technical information from the lab to non-lab members.

3) Graduating from Science Tokyo³

- Taking undisclosed technical information (data for a thesis/paper, etc.) out of Japan after graduation
- Taking samples of research material out of Japan after graduation

³ In the case of international students, this includes returning to or communicating with those in their countries

Academic supervisors: When your students are to conduct any of the activities above, you are required to verify whether or not the activity in question is subject to Security Export Control. If internal examination is required, please fill out and submit the Consultation Form (available from the [Security Export Control website](https://www.titech.ac.jp/english/0/about/policies/efforts/export-control) for faculty members) to the section in charge of Export Control. <https://www.titech.ac.jp/english/0/about/policies/efforts/export-control>

If you have any questions, consult the section in charge of Security Export Control.
Email: ic_exportcontrols@adm.isct.ac.jp

● 安全保障輸出管理とは？

世界の平和と安全の維持のために、武器※や軍事転用可能な技術・貨物を、安全保障上懸念のある国家やテロリストの手に渡さないようにするための、外為法（外国為替及び外国貿易法）に基づく管理制度※²のことです。

※「武器」とは、通常兵器と大量破壊兵器（核兵器、化学兵器、生物兵器、及びそれらを搭載したミサイル）の両方を意味します。

※² 違反した場合、刑事罰（懲役：10年以下、または罰金[法人]：10億円以下、[個人]：3千万円以下もしくは併科）、行政制裁（3年以内の、貨物の輸出・技術の提供の禁止）が科されます。

● 輸出管理手続きが必要なとき（下記のいずれかに当たるときは指導教員にご相談ください。）

1) 日本国外に行くとき※³

- ・海外で行う技術の提供が、未公開の情報である場合
- ・海外へ物品（サンプル、機器、USBデータ等）を持ち出す場合
- * 外国へ物品を送る場合も同様の確認が必要です。なお、金額は関係ありません。

2) 日本国外に連絡するとき※³

- ・研究室内の未公開技術情報を、海外へ提供する場合
- * SNS等のネットワークを介しての通信による技術提供も同様です。
- * 多くの研究室で、未公開技術情報を研究室外へ提供することを禁止しています。

3) 卒業するとき※³

- ・論文作成前のデータ等、未公開の技術情報を海外へ持ち出す場合
- ・研究成果物のサンプルを海外へ持ち出す場合

※³ 留学生が自国へ帰る・連絡する場合も含まれます。

指導教員のみなさまへ 研究室の学生が上記の活動を行う場合、指導教員は自らの研究活動での輸出管理と同様に問題がないかを確認し、学内手続きが必要な場合等は、相談シート（教職員向け安全保障輸出管理HP掲載）に記入し、安全保障輸出管理相談窓口までご提出ください。
